

Cleaning and servicing with a flick of the wrist

As well as their superb slicing performance, Schiwa production lines stand out from the rest due to their excellent ergonomic design. The Schiwa Walk-In Design concept – the only one of its kind in the world – makes the entire machine area extremely easy to access. The operator is able to work inside the line standing upright, making hygiene, inspections and maintenance a whole lot easier.

A few examples:

- Easy blade change: the blade is removed and replaced by the operator standing upright
- The line can be cleaned considerably easier, more efficiently, faster and more thoroughly
- Top and bottom runners can be moved clear of the work area
